

Let's Make a Baby!

Congratulations on your new arrival! You and your partner will be welcoming a new addition any moment now. Instead of conceiving in the usual manner you will be tossing coins to determine the characteristics of your child. The coins will represent gametes (sperm and egg).

In all of the characteristics listed below, **heads** represents the **dominant allele**, **tails** represents the **recessive allele**. There are 3 possible genotypes for each toss. Notice that not all characteristics show complete dominance; some are examples of incomplete dominance and some characteristics are controlled by multiple genes (polygenic). You will determine polygenic traits separately.

Materials *(per group)*

3 textbooks

2 coins

Procedure

1. Place the textbooks on the laboratory table so that they form a triangular well.
2. Determine which partner will toss for the female and which will toss for the male. Remember that there are two genes per trait.
3. Have the partner who is representing the male flip a coin into the well to determine the sex of the baby. If the coin lands heads up, the baby is a female. If the coin lands tails up, the baby is a male. Record the sex of the baby in the blank at the top of the page with Table 1.
4. For all the coin tosses you will now make, **heads will represent the dominant allele and tails will represent the recessive allele.**
5. You and your partner should now flip your coins into the well at the same time to determine the phenotype of the first trait, the shape of the face. Note: *The coins should be flipped only once for each trait.*
6. Continue to flip the coins for each trait listed in the table. After each flip, record the genotype and phenotype of your baby in the corresponding row of the table. (Note: Some information on these traits has been simplified. Some listed traits are actually produced by two or more genes.)
7. Using the recorded traits, draw the facial features for your baby in the space provided.

Sex of our baby____Our baby's name_____

Time & Date of Birth_____

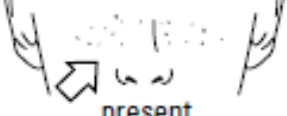

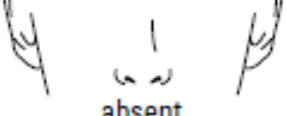

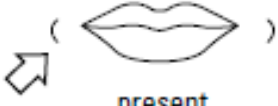

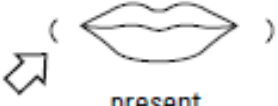

Table 1

TRAIT	OUR BABY'S GENOTYPE	OUR BABY'S PHENOTYPE
Shape of face		
Cleft in Chin		
Texture of Hair		
Widow's Peak		
Spacing of Eyes		
Shape of Eyes		
Position of Eyes		
Size of Eyes		
Length of Eyelashes		
Shape of Eyebrows		
Position of Eyebrows		
Size of Nose		
Shape of Lips		
Size of Ears		
Size of Mouth		
Freckles		
Dimples		
Eye Color		
Hair Color		
Skin Color		

Traits	Dominant (both heads)	Hybrid (one head, one tail)	Recessive (both tails)
Shape of face	 round <i>RR</i>	 round <i>Rr</i>	 Square <i>rr</i>
Cleft in chin	 present <i>CC</i>	 present <i>Cc</i>	 absent <i>cc</i>
Texture of hair	 curly <i>HH</i>	 wavy <i>Hh</i>	 straight <i>hh</i>
Widow's peak	 present <i>WW</i>	 present <i>Ww</i>	 absent <i>ww</i>
Spacing of eyes	 close together <i>EE</i>	 medium distance <i>Ee</i>	 far apart <i>ee</i>
Shape of eyes	 almond <i>AA</i>	 almond <i>Aa</i>	 round <i>aa</i>
Position of eyes	 straight <i>SS</i>	 straight <i>Ss</i>	 slant upward <i>ss</i>
Size of eyes	 large <i>LL</i>	 medium <i>Ll</i>	 small <i>ll</i>

Traits	Dominant (both heads)	Hybrid (one head, one tail)	Recessive (both tails)
Length of eyelashes	 long <i>LL</i>	 long <i>Ll</i>	 short <i>ll</i>
Shape of eyebrows	 bushy <i>BB</i>	 bushy <i>Bb</i>	 fine <i>bb</i>
Position of eyebrows	 not connected <i>NN</i>	 not connected <i>Nn</i>	 connected <i>nn</i>
Size of nose	 large <i>LL</i>	 medium <i>Ll</i>	 small <i>ll</i>
Shape of lips	 thick <i>TT</i>	 medium <i>Tt</i>	 thin <i>tt</i>
Size of ears	 large <i>LL</i>	 medium <i>Ll</i>	 small <i>ll</i>
Size of mouth	 large <i>LL</i>	 medium <i>Ll</i>	 small <i>ll</i>
Freckles	 present <i>FF</i>	 present <i>Ff</i>	 absent <i>ff</i>
Dimples	 present <i>DD</i>	 present <i>Dd</i>	 absent <i>dd</i>

Eye color, hair color, and skin color are more complicated than the characteristics already listed. These traits are considered to be polygenic (controlled by many genes).

EYE COLOR	6	5	4	3	2	1	0
Each of you toss your coin 3 times. Add up the total for the eye color.	Dominant (HHHHHH)	Dominant (HHHHHT)	Dominant (HHHHTT)	Dominant (HHHTTT)	Dominant (HHTTTT)	Dominant (HTTTTT)	Dominant (TTTTTT)
	Dark Brown	Brown	Light Brown	Hazel	Blue Green	Blue	Light Blue

HAIR COLOR	6	5	4	3	2	1	0
Each of you toss your coin 3 times. Add up the total for the hair color.	Dominant (HHHHHH)	Dominant (HHHHHT)	Dominant (HHHHTT)	Dominant (HHHTTT)	Dominant (HHTTTT)	Dominant (HTTTTT)	Dominant (TTTTTT)
	Black	Dark Brown	Brown	Light Brown	Dark Blonde	Blonde	"Platinum" Blonde

SKIN COLOR	6	5	4	3	2	1	0
Each of you toss your coin 3 times. Add up the total for the skin color.	Dominant (HHHHHH)	Dominant (HHHHHT)	Dominant (HHHHTT)	Dominant (HHHTTT)	Dominant (HHTTTT)	Dominant (HTTTTT)	Dominant (TTTTTT)
	Darkest Brown	Medium Brown	Dark Tan	Medium Tan	Light Tan	Fair Skin	Very Pale Skin
